

Small Orgone Pendant

with African medicinal herbs called MUTI

Orgone pendant by Organise Africa - for effective radiation protection, and energetic wellbeing.

Wearing an Orgone pendant protects your personal energy field from physical and electromagnetic pollution. It is small enough to comfortably carry around your neck, but the effect that it has is big enough and entirely sufficient. Depending to the combination of materials, each Orgone pendant distributes different protection and support.

On the backside of this wonderful Orgone creation (the opposite side of the carrier), it contains positive hematite and garnet from Kuruman (South Africa) in a mini SBB coil, from the African herbal medicine of Dr. Chipangula. *(This beautiful organite creation contains the MUTI* powder of our spiritual healer "NaDlonge")*

Each orgone pendant consists of two combined, half lenticular parts. On the side facing away from the carrier, a mini-SS coil is embedded.

The metallic organite consisting of quartz, amethyst, black tourmaline and the so-called MUTI powder is usually located on the side of the body, in this case the heart chakra. The string is decorated with glass pearls and real red garnet.

„Valanda, a respected spiritual healer and good friend of Georg Ritschl, often orders a handful of these pendants, and not only because of the extraordinary protective effect that these pendants have. She has tested various “MUTI Organite Pendants” during the trial phase, and the enthusiastic feedback we got from her and her clients is one of the main reasons why Georg is introducing this product to the public and far across the border.

As always with organite, the simple orgone mixture has a huge effect. With the additional MUTI powder and the additional healing stone that is added, this little, portable pendant becomes an exceptional and potent protective shield against etheric interferences and possible radiation due to the use of mobile phones.

SPECIAL HEALING BENEFITS & INGREDIENTS:

- ✓ **Orgonite matrix of resin, metal and quartz crystal** *(for protection against electromagnetic radiation)*
