

# Gold lapis pyramid with orgonite

*Powerful orgone generator with lapis lazuli & African herbs ("muti")  
for protection against psychic attacks (black magic, etc.) and electromagnetic radiation (from  
smartphones, WLAN, etc.)*

## *The benefits of orgonite ...*

*... can be experienced on many levels and can now be proven through various experiments. Orgonite converts stagnant negative energy (DOR) into positive life energy (POR or Positive Orgone Energy).*

*In this way orgonite protects against harmful radiation from cell phone towers and other man-made sources, promotes the growth and health of plants, humans and animals and raises general awareness.*

*Mobile orgone generators, either cone-shaped (HHG) and pyramid-shaped, are ideal for use at home, in the house, in the garden or at work, in the office for example.*

A psychic and healer friend of Georg Rietschl's came to him with a relatively clear idea of how these pyramids should look like and what they should contain.

The Gold Lapis Pyramid consists of an inner pyramid, covered with gold leaf. The tip has a recess where the lapis lazuli is located. Lapis lazuli is also known as the "stone of truth". Apart from the lapis and other crystals, in the base of the pyramid is a gilded cross where the muti powder from African herbal medicine is integrated.

From her experience, the clairvoyant and healer confirms that the muti powder provides very strong spiritual and mental protection against black magic. She uses the muti-orgonite to treat her patients or clients who often suffer from psychic attacks.
